### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claimed invention including the feature of main combustion zone oxidant fuel burning, combustion zone downstream product mixing recirculation zone having an injection zone either proximate or downstream the main combustion zone or recirculation zone, and injecting post combustion products in the injection zone such that CO and NOx levels are optimized are not found in the prior art either singly or in combination. The closest prior art reference is considered Korenberg (US 5,285,628) which discloses successive stage combustion for lower CO and NOx but without the injection feature as claimed. Other prior art references cited in this article contain one or more of the claimed features, but not the necessary motivation or combination suggestion to obviate the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).

Art Unit: 3749

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira S. Lazarus can be reached on 571 272 4877. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
